Anesthesia / Surgical Pre-Operative Instructions

Thank you again for selecting Schneider Oral Surgery to provide your clinical and surgical care. To prevent any discomfort, once you are asleep, you will also receive local anesthesia around the surgical sites. This combination of local anesthesia and intravenous sedation was recommended as the most appropriate technique for you. To help us provide the absolute best treatment; we ask that you follow these very important preoperative and postoperative instructions.

1. Please **DO NOT EAT or DRINK** anything for **6 hours** prior to your surgery, unless directed otherwise by your surgeon.
2. **Daily medications** may be taken with a minimal amount (sips) of water.
3. Take pre-operative medication as directed. **HYDROXYZINE 2 TBLSP.** 1 hour before your appointment. **DO NOT** drink after taking this medication.
4. Please wear loose-fitting clothing with short sleeves. This will allow placement of the required monitors without difficulty and provide more accurate diagnostic information during your anesthesia.
5. Please do not wear any make-up or jewelry.
6. Please visit the restroom immediately before your appointment time.
7. You should not do the following for **24-hours** after your sedation/anesthesia:
 - Drive a motor vehicle
 - Operate or work around machinery
 - Make financial or significant personal decisions
 - Drink alcohol
8. You should plan on resting the remainder of the day following your surgery. Someone should be available to check on you throughout the remainder of the day or provide assistance at night if necessary.
9. A responsible adult must accompany you before your anesthesia or sedation can be started.

Your appointment is scheduled for _____, _____ A.M. _____ P.M.

Please feel free to contact us if you have any questions regarding your planned anesthesia/surgery or overall treatment.
